

SPECIALIST MARKET TRAINING

Greenview Strategic Consulting
is pleased to offer the latest
leading edge training.

- Specialist NEM knowledge of generation, transmission and market dynamics;
- Contemporary market knowledge offering multiple participant perspectives; generator, retailer, end user, transmission and market operator; and
- Effective communication style; able to explain complex power system dynamics at all levels of understanding.

Course material is tailor made to your specific needs in a workshop environment at your site, ensuring training costs are kept to a minimum.

Material can be tailored to include the following topics:

- New entrant registration training, market background and region-specific positioning;
- Market regulatory environments, including state and national regulatory setup and functions;
- Market operations, dispatch processes and general market operation, including network constraints and FCAS; and
- Generation dispatch and plant optimisation, both scheduled and semi-scheduled plant.

Facilitator:
Jonathon Dyson

Jonathon has over 15 years practical experience in:
