Generator Statistical Digest 2022

Produced by  Global-Roam™

Background

The **GSD2022** was released in January 2023 and is the fourth annual update to the *Generator Statistical Digest* series developed by **Global-Roam Pty Ltd** and **Greenview Strategic Consulting**.

In a similar format to previous years, the GSD2022 contains performance statistics for each generation and storage unit in the NEM that was operational in 2022. For each unit, the GSD displays an A and B page which shows:

- 10 year historical overview of key performance metrics, spanning 2013 to 2022 calendar years
- 12 month detailed performance metrics for the 2022 calendar year

As an optional extra, we have also made an extract of the data contained within the tables and charts of the GSD2022 available which you can order in addition. Further details about the GSD2022 can be found at the link below:
